ServicePRO XP

Service Body

The Monroe ServicePRO XP is our toughest most advanced service body yet. Built on the proven strengths of Duramag and Royal and powered by the innovative features of Monroe ServicePRO, this body delivers extreme-duty strength, weather-tight protection, and long-term reliability. XP means Extreme Protection—stronger, smarter, and built to protect your crew, your equipment, and your investment, mile after mile.

Highlights

- **Resist any weather:** built to seal out the elements and lock in long-term value. Stay safe from common corrosion factors, like salt, humidity, drying cycles, and temperature changes. With our ArmorGloss™ protection, the body itself is built to survive harsh conditions.
- **Service ready:** outfitted with a generous package of standard features, the ServicePRO XP service body comes prepared, so you're organized, secure, and up and running on day one.
- **Tested strong:** body and accessories are engineered for a perfect fit and mutually reinforcing performance under pressure, ensuring your service body lasts the test of time through the toughest of jobs.
- **Maximized storage:** transform your service body compartments into a fully customizable workspace with our modular InfinityStrut Mounting System and accessories. Designed around the strength and versatility of Unistrut mounting channels, our InfinityStrut system lets you configure your storage exactly the way you need it.

Your benefits

- **Precision fit:** a precision engineered fit for the body, doors, and accessories eliminates common corrosion traps, offers better protection and security for tools, and our durable, ArmorGloss™ coating for resistance to the elements.
- **Engineered for serious work:** HUCK® Lock Bolt® fasteners create permanent, vibration-proof joints with exceptional clamp force and fatigue strength, often outperforming traditional welded joints. With rugged, high-capacity construction improvements like a streamlined floor design and a 5-point door locking security system, you'll be ready for anything.
- **Safety first:** the StepMate™ bumper system makes it easier and safer to get in and out of the cargo space with grab handles, a pooched bumper, and the lowest step height on the market.
