At Rocky Ridge, we move past the "standard" Jeep customizations and go all-in to make each of our Wranglers stand out on the street or trail. With a 3" lift and 20" or optional 22" wheels, our Wranglers will take you anywhere you need to go. We remove any guesswork out of the customization equation by adding a steering stabilize, reinforcing hinges, & oversize spare tires allowing you to roll off the lot and onto the trail with no delays.
