

COMMERCIAL FLEET TIRE SERVICE TRUCK

# STELLAR® BACK-PAC

TECHNICAL SPECIFICATION GUIDE

**The Back-Pac is the perfect solution to those times when a full-blown service truck is too much but a simple pick-up truck is just not enough.**

The Back-Pac is available in a self-contained gasoline engine driven unit. This unit provides a quick and easy interchangeability from truck to truck while maintaining a professional appearance for your business.

The gasoline-driven Back-Pac is designed to be Stellar's entry level module of the commercial fleet series. The gasoline-driven Back-Pac includes a 12.5-horsepower gas engine driving a 23 cfm 2-stage compressor. This module includes a 30-gallon air tank and an FLR. Only one air hose reel is offered with the gas-driven model; the 1/2" by 50-foot model.

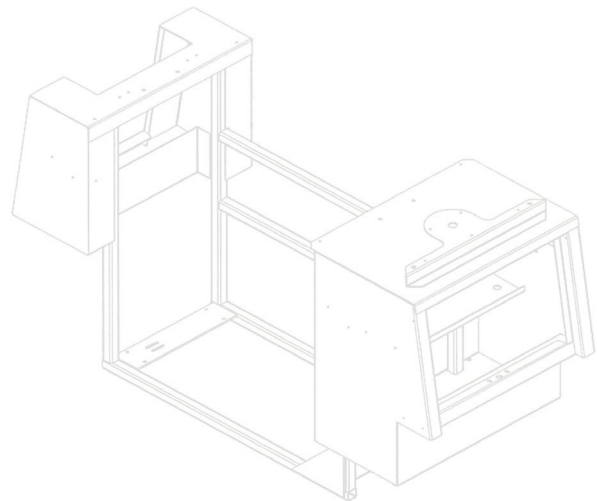

Dimensions are 28" (wide) x 41" (high). Approximate weight is 750 lbs. and has a quick and easy four-bolt installation.

Includes a 1/2" x 50' retractable hose with reel and compartment and an air filter / lubricator / regulator (FLR). The light package includes a strobe light, two floodlights and a tool compartment light.

# SPECIFICATIONS

- Self-contained gasoline engine-driven unit
