

*Building An American Legacy One Truck Body At A Time*

## *40 Years of Innovation, Quality, and Commitment to Excellence*

2019 is our 40th year in business. It is hard for us to believe how far we have come and where we are today.

As young men all three Scelzi brothers had a passion for cars and trucks. Mike, Jim, and Gary each spent time in related industries, but in the end they joined forces at Scelzi Enterprises to design and manufacture the best work truck bodies in the USA.

Mike, the oldest, started by building cars in his garage. At age 20 he was the youngest Mobile Gas Dealer ever, owning the station at the corner of Chestnut and Olive Avenues in Fresno, California. When he was 22 he began making custom wheels, and when he later sold the station he worked for a company that produced boat and car trailers, grain trailers, transfer dump trucks, flatbeds, and work truck utility bodies. This experience helped shape his future. He also briefly worked for a wholesale plumbing company.

Jim, at age 16, worked with Mike at the Mobile Station. When the station was sold Jim began working as a plasterer until he was about 25, when he became a partner with his father Monroe at the MJ Scelzi and Sons fuel distributorship. He worked part time at Scelzi Enterprises, which had recently been formed. Jim joined his brothers full time at Scelzi Enterprises in 2006.

Gary – the youngest brother – worked at Hallowell Chevrolet while attending high school. Once he graduated he joined his brother Mike at Scelzi Enterprises in 1979. In 1997 he focused on becoming a world-class drag racer, and continued this until his retirement from racing full time in 2008. During that 9 year span, Gary won four National Hot Rod Association (NHRA) World Championships. Although retired as an active racer himself, and fully committed to Scelzi Enterprises, Gary still maintains an interest in watching his two sons Dominic and Giovanni begin their own racing careers as part of the Gary Scelzi Motorsports organization.

Their father Monroe Scelzi always believed his sons should be in business together, so he loaned the brothers \$20,000 so they could open the first Scelzi Enterprises manufacturing facility in 1979, on Thesta Avenue in Fresno. Since then the success of the company has caused them to expand many times, and it presently utilizes more than 300,000 square feet of space, making Scelzi Enterprises the largest Truck and Body manufacturing facility in California.

Today the Scelzi Legacy continues, and our commitment to Quality is stronger than ever. As we fondly look back over the past 40 years, we are extremely grateful to the employees, dealers, and key partners who helped us reach this moment.

*Don't Settle For Less Than A Scelzi!*

### **SCELZI ENTERPRISES MISSION STATEMENT**

We utilize innovative truck body designs and an uncompromising Commitment to Quality to exceed our customer's expectations — providing value to our owners, our business partners, our team members, and our end users.

# Facilities

It started in our garage in Fresno, and then spread to a small building on Thesta Avenue. Today Scelzi Enterprises covers more than 300,000 square feet in California and Colorado.

Our Fresno facilities make Scelzi Enterprises the largest manufacturer of truck bodies on the West Coast. Covering 25 acres in Southwest Fresno and including 300,000 square feet of office and manufacturing space, we employ more than 400 employees of various skills and talents to contribute to the Quality of our organization.

We also have locations in Riverside, California (above) and in La Salle, Colorado (below) and partnerships with distributors in Oregon, Washington, and a growing list of other states. Wherever we are and whoever we select as a partner, we make sure the Scelzi Commitment to Quality is embedded deep into every product we manufacture, and in every person we employ.

Our Medium Duty Truck Body Facility opened in Fresno in 2017, vastly expanding our manufacturing capacity for larger truck bodies.

# Why Do Scelzi Truck Bodies Last Longer Than Other Bodies?

## 1 More Robust Design

Over 1100 pounds, and no Salad Bar in sight!  
Only Scelzi Truck Bodies Can Handle This Load

When you drive a SCELZI you can leave the tall ladder at home!

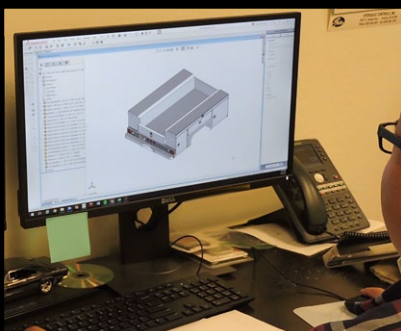

## 2 Premium Components

Thicker gauge steel for extended life

## 3 Precision Engineering, Welding and Assembly

Scelzi Flatbed bodies are available in several different styles:

1. Scelzi Flatbed - with an "angled" tail plate and California Dock Bumper in back.
2. Western Flatbed - with a "squared" ICC Dock Bumper in back.
3. Flatbed Dump with hoist
4. Custom Flatbed

# Standard Features On All Scelzi Signature Truck Bodies

Open tops - open top lids of 16 gauge galvalneal metal with smooth tops, "Z" style hat section, using 18 gauge inner panel, with aluminum diamond plate overlay. Scelzi Enterprises has the strongest open tops in the industry. Heavy duty gas shocks 2 per open top for easy door opening. 4 1/2" deep open top tray.

Doors - double panel door 18 gauge outer, 20 gauge inner laminated together for greater durability "Z" style hat section for extra strength. Doors mounted using stainless steel hinge block with nylon insert, stainless steel self sealing mono bolt, and 5/16 stainless steel full length door shaft.

Door Seals - Special design contour - Neoprene seal inside the door.  
1/8 x 1/2 rubber stops the door from chaffing against the body.

Gas shocks on open top compartments and vertical doors.

Tailgate - heavy duty self leveling tailgate with 12 gauge diamond plate inner panel and 1/4" stainless steel end cap.

Stainless steel hinge block with nylon insert

Tailgate bracket - 10 gauge stainless steel.

Scelzi Signature Service Body Is Shown

Shelves - 16 gauge galvanized with return flange curl. Shelf brackets are 12 gauge galvanized.

Shelves are Heavy duty lock-in-place

All vertical compartments have 2 adjustable shelves, horizontal compartments have 1 adjustable shelf

Three point latching system on all compartment doors.

All shelves are adjustable on 2" centers

Tail hinges on 5/8" stainless steel Allen Head Shoulder Bolt with 5/8" Bronze Bushing.

Seal-beam type tail, clearance and back-up lights.

All bodies equipped with a six-inch step bumper. Powder coated grey.

Superior underbody construction using thicker gauge steel and more cross-members than other truck body builders

## Additional Signature Body Features:

- Six-point mounting on 8 and 9 foot bodies. Eight point mounting on 11 and 13 foot bodies.
- All beds are caulked with Ultra Neoprene sealers, and the underside of the bed and wheel wells are under-sealed before the bed is installed
- Multiple coats of primer and urethane paint are added for longest durability

Chrome Scelzi T-Bar handle latches with polished rivet-free stainless steel pockets and Galvalneal steel locking rods

Three-year bulkhead to bumper warranty

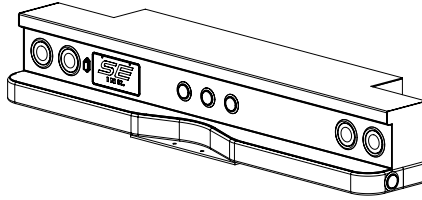

All compartment doors equipped with barrel locks

## Key Features and Options on Scelzi Water Trucks

Three square Manholes on 4000 gallon tanks

Two 24" x 24" Manholes

3/16" thick steel tank skins welded inside and out

Driver and passenger-side Adjustable Spray Fittings

2.5" Hydrant Fill Pipe

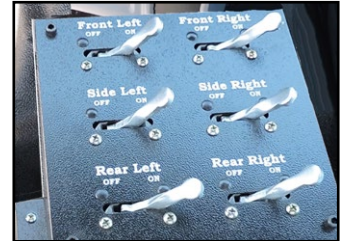

Optional Hose Reel

Front and Rear Spray Bars

Heavy Duty Steel Ladder

24" Stinger Storage with lockable lid

Cab control box

### Unique Scelzi Water Tank Features:

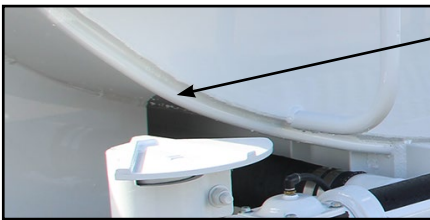

- A-Rubber Mounts between the long sill and chassis to minimize vibration
- B-Spring tank mounts to act as shock absorbers independent of the chassis

Optional LED Enhanced Light Kit

Optional 1/4" Thick Belly Steel Overlay

Photos may contain optional equipment - verify your specifications when you order.

## WT-2000      2,000 Gallons      Standard Specifications

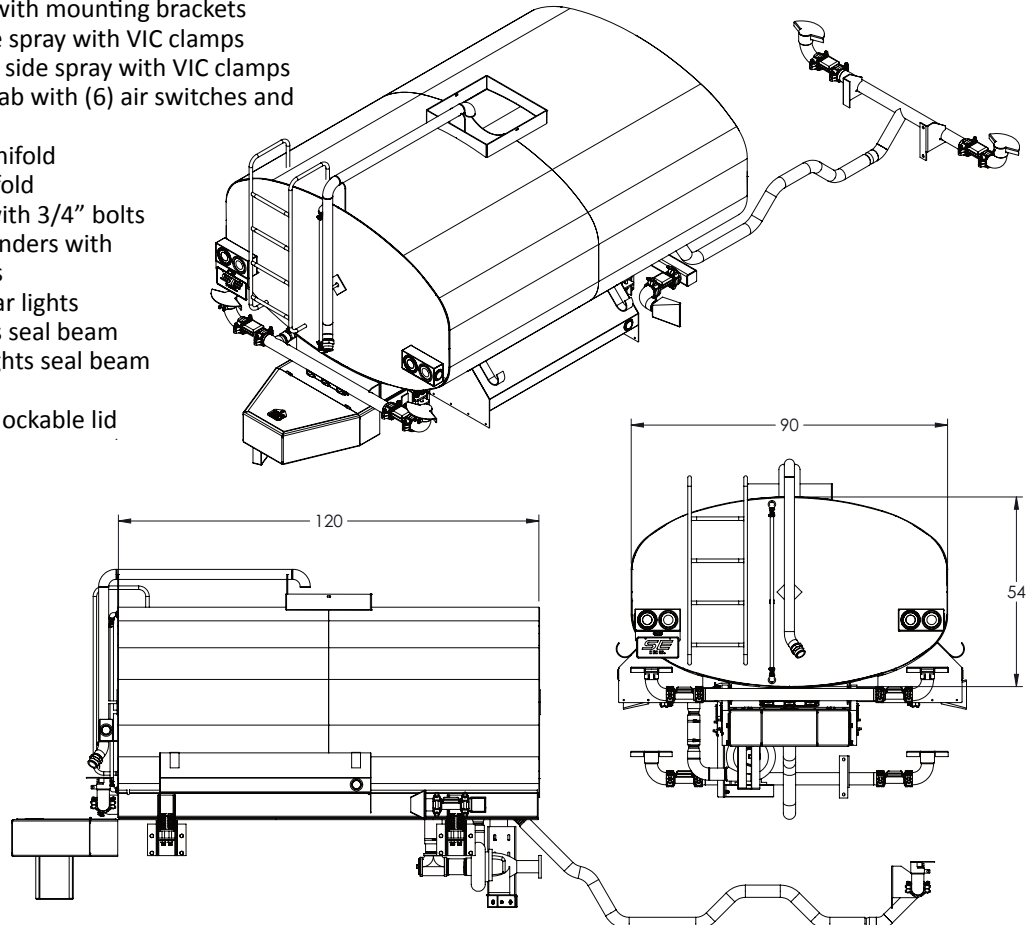

### Standard

#### Features:

- Chelsea Air Shift PTO
- 4" x 3" Berkeley water pump (750 GPM)
- Spicer PTO Driveline
- 4" x 4" Water Manifold
- 3" Standard Air Valves
- 3" Slip on splash spray heads for front
- 3" x 53" Front spray bar with mounting brackets
- 3" Slip on splash spray heads for rear
- 3" x 53" Rear spray bar with mounting brackets
- 3" Adjustable driver side spray with VIC clamps
- 3" Adjustable passenger side spray with VIC clamps
- One control box inside cab with (6) air switches and Air control for PTO
- 1-1/2" Gate valve at manifold
- 3/4" Gate valve at manifold
- 4" Water tank mounts with 3/4" bolts
- One set of water tank fenders with hooks for hoses
- OEM Tail Stop & turn rear lights
- 2-1/2" Red marker lights seal beam
- 2-1/2" Amber marker lights seal beam
- 36" Rubber mud flaps
- 24" Stinger at rear with lockable lid
- 1/2" Sight gauge at rear

### Options:

- Hot shift PTO for Allison Transmission
- Upgrade to CLA – Val Air Valves
- 1/4" Thick overlay "Belly" at lower level of standard 3/16" thick tank, which significantly slows "rot-out" of bottom of tank
- 6" Diameter gravity water tank dump valve at rear bottom of tank with "Fan Nozzle".

Photos may contain optional equipment - verify your specifications when you order.

## Electronic Locking Systems

### Scelzi Electronic Locking System®

Covered under patent #8,869,576 B2

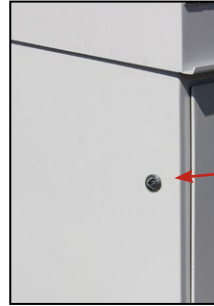

Rotary electronic master lock system provides additional protection for service body compartments in addition to the Scelzi locking T-handles. The Scelzi Electronic Locking System® can be used with an auxiliary remote or can be tied in to the factory electronic door locking system if the chassis is equipped with the automatic door lock option. The system utilizes an electronic actuator to activate a rotating rod to positively lock a cam system to the door. This provides a remote system to enhance the body security without the addition of parts protruding to the outside of the body.

The system is available on all standard service bodies -- contact your factory representative for availability on other body styles.

For both Electronic and Manual systems, a rotating rod is activated to lock a cam system to the door.

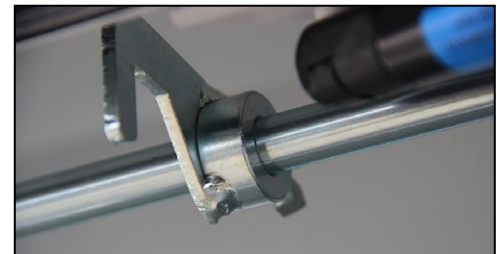

Can be programmed into the truck's cab security key for ease of use.

Electronic actuator. When activated the patented locking system rotates the rod and cam system

Heavy duty cam and hook

### Scelzi Manual Master Lock System\*

Manual master lock system provides an independent locking system to increase vehicle security above the level offered by traditional compartment locks. The system utilizes a positive lock cam system controlled by a stainless steel handle located on the rear of each service body side pack. The handle is then secured in the locked position with a padlock. All hardware provided is stainless steel or zinc coated for enhanced corrosion protection.

The system is available on all standard service bodies, for applications relating to custom and crane bodies contact your factory representative.

Unlocked

Locked

When manually activated the locking system rotates the rod and cam system that hooks into the door
